

Self-assessed security measures, aligned with ISO/IEC 27001, not certified by a third party to date.

Scope

Three datacenters located in France.
Essarts-en-Bocage (Vendée), Saint-Gilles-Croix-de-Vie (Vendée) and Nantes (Loire-Atlantique)
No dependency on a hyperscaler. Datacenters owned and operated by our own team.

Governance

CISO
François-Guillaume Ribreau — security@france-nuage.fr

DPO
Robin Straub — robin@france-nuage.fr

ISO/IEC 27001:2022 posture

Self-assessed status of the 93 Annex A controls, published control by control.

Key measures

- | | |
|--|--------|
| ■ TLS in transit everywhere, secrets encrypted at rest (XChaCha20-Poly1305), encrypted WireGuard mesh. | A.8.24 |
| ■ Daily backups with retention, an off-site copy and regular restore testing. | A.8.13 |
| ■ Multi-datacenter redundancy: database and application replicas, cross-zone anti-affinity. | A.8.14 |
| ■ Default-deny networking, explicit allow rules and per-tenant network isolation. | A.8.20 |
| ■ Least privilege: read-only RBAC by default, administrative rights held in the database. | A.8.2 |

Published policies

Every policy is public and maps to the matching ISO/IEC 27001:2022 controls.
